

BARNSLEY ES PTA SCIENCE CLUB SPRING 2016

7 weeks / \$115 Fridays 8:10 - 9:10am

April 15,22,29 May 6,13,20, 27

Grades K-2

Building Wearable Circuits

- Our young scientists will explore electricity by building simple circuits. We will experiment with electronic devices, circuits, and wearable technology.
- **Projects include:** Making your own flashlight and designing an LED ring!

Grades 3-5

It's Electric!

- We depend on electricity every day! Your scientist will investigate in depth about static electricity, learn about the structure of the atom, and build circuits and switches.
- **Projects include:** Making a fruit powered battery and building an electric doorbell!
